🌐 Global / Remote

PROFESSIONAL PROFILE

Detail-oriented and analytical Data Analyst with expertise in transforming raw data into actionable business intelligence insights. Proficient in leveraging Python, SQL, Power BI, Excel, and Tableau to extract, clean, analyze, and visualize complex datasets. Strong foundation in Information Systems paired with formal certification in Data Analysis. Skilled in building interactive dashboards, streamlining ETL processes, and driving data-informed strategic decisions.

TECHNICAL SKILLS & EXPERTISE

Data Analysis & Querying

- **Python:** Pandas, NumPy, Data Cleaning & Wrangling
- **SQL:** Complex Queries, Joins, Aggregations, Data Extraction
- **Power Query:** Data Transformation & ETL Pipelines

Data Visualization & BI

- **Power BI:** Interactive Dashboards, DAX, Data Modeling
- **Tableau:** Visual Analytics, Workbooks & Calculated Fields
- **Microsoft Excel:** Advanced Formulas, Pivot Tables, Analysis

CORE COMPETENCIES

Business Intelligence & Reporting: Designing intuitive dashboards and reports that translate analytical findings into clear business insights for key stakeholders.

Data Wrangling & Quality Assurance: Cleansing, transforming, and validating structured/unstructured datasets to ensure data integrity and accuracy.

Data-Driven Problem Solving: Identifying trends, anomalies, and opportunities within complex data structures to support tactical and strategic objectives.

EDUCATION & PROFESSIONAL CREDENTIALS

Data Analysis Diploma (130 Hours)

INSTANT Software Solutions

Comprehensive, hands-on training focusing on statistical analysis, data visualization, predictive modeling techniques, and end-to-end analytics workflow implementation using Python, SQL, Power BI, and Tableau.

Higher Certificate in Information Systems

Academic Institution

Solid foundational coursework covering information technology systems, database design, computer networks, systems analysis, and software fundamentals.
